

CONTENTS

NO. 1 FEBRUARY 2001

- JOHAN PAULSSON AND MÅNS EHRENBORG. Noise in a minimal regulatory network: plasmid copy number control 1

- ALAN J. WILLIAMS, DUNCAN J. WEST AND REBECCA SITSAPESAN. Light at the end of the Ca^{2+} -release channel tunnel: structures and mechanisms involved in ion translocation in ryanodine receptor channels 61

NO. 2 MAY 2001

- DEBORAH LECKBAND AND JACOB ISRAELACHVILI. Intermolecular forces in biology 105

NO. 3 AUGUST 2001

- J. WIDOM. Role of DNA sequence in nucleosome stability and dynamics 269

- ANDREW L. HARRIS. Connexin channels: Emerging biophysical issues or Biophysics fills the gap 325

NO. 4 NOVEMBER 2001

- D. PETER TIELEMAN, PHIL C. BIGGIN, GRAHAM R. SMITH AND MARK S. P. SANSOM. Simulation approaches to ion channel structure-function relationships 473

- ARIEH WARSHEL AND WILLIAM W. PARSON. Dynamics of biochemical and biophysical reactions: insight from computer simulations 563
